PROFILE

Motivated MERN stack developer with a strong foundation in web technologies, hardworking and fast-learning. Skilled in building responsive, dynamic applications using MongoDB, Express, React, and Node.js. Eager to contribute to a team and grow professionally in a challenging environment.

PROJECTS

BULKMAIL APP

BulkMail is a full-stack application for managing and sending bulk emails. The front end, built with React, provides an intuitive interface for creating and organizing email campaigns. The back end, using Node.js and Express, handles email processing and delivery, while MongoDB stores recipient lists and templates. This app ensures efficient, scalable, and reliable bulk email management.

ACTODO PROJECT

Actodo is a task management web application built using React and React Router, designed to help users manage their daily tasks efficiently. The app features a user-friendly interface with login and signup functionality, allowing users to create, update, and track their tasks. With seamless navigation and responsive design, Actodo offers an organized and productive way to stay on top of to-do lists.

INTERNSHIP

DELTA INFO LABZ

FULL STACK DEVELOPER INTERN

"Currently interning as a full stack developer, focusing on building dynamic web applications using React.js. Gaining hands-on experience in developing front-end features and collaborating with the back-end team.
